

TEST AUTOMATION SERVICES

Today, with the frequent updates to software applications, government agencies need to rapidly test to ensure their software platforms continue to run without disruption.

OUR SOLUTION

We can help you **save time and money** by automating your software testing. Our methodologies are honed to identify any issues your users might encounter before any release. Our affordable offerings for automated software testing are quick to set up and will enable frequent testing, avoiding any disruptions to your users. We can help ensure that your critical software applications will continue to run effectively without issues as technology advances.

TESTING AUTOMATION FOR ACCELA

SEP Tech specializes in test automation for Accela products utilizing our preconfigured libraries of objects and functions to quickly create, maintain and execute testing suites for Accela components such as automation, citizen access, and interfaces. All test cases replicate actions performed by your users. Dependable reusability is ideal for testing of Accela upgrades and custom enhancements.

ACCELA TESTING-AS-A-SERVICE

Ensure seamless and bug-free Accela releases by subscribing to our Accela Testing Service.

We will rigorously analyze your Accela installation including all configured record types, their workflows and fee schedules, and all associated business rules. We will design custom test cases and end-to-end test scenarios and automate them all, with no upfront charges. We will run them and provide you with test results and bug reports (with screenshots) within hours when requested.
